Summary

Went from accounting to web development and I am so happy with the decision! I love logical problem solving and generating solutions that produce visual results. I also love when I am given the freedom to express my creative side and design pages myself

Professional Experience

Jul 2018 – Mar 2021
Toronto, ON

Senior Fund Accountant
Citco (Canada) Inc
- Communicated with investment managers to execute trades, price securities, and post all journal entries to accurately calculate the monthly Net Asset Value
- Reviewed and reconciled financial models
- Liaised with global offices to help transition repetitive tasks overseas while monitoring their performance and delegating tasks to support routine reporting processes
- Generated, reviewed, and distributed the monthly financial statements to investors and investment managers
- Created a variety of new reports to improve operational efficiency and made additional controls to allow for more consistent and accurate results thereby significantly reducing overtime requirements

Jun 2017 – Jun 2018
Toronto, ON

Analyst
LG Electronics
- Provided sales staff and product managers with increased visibility and improved account management by developing spending reports, assessing clients' annual contracts, and forecasting future promotional expenses
- Reviewed and validated the performance of their marketing, loyalty, and co-op programs to build strategies that effectively focus sales efforts on targeting new and existing businesses
- Analyzed and presented performance metrics and trend analysis against industry standards while offering solutions to improve LG's competitive edge in areas of weakness
- Automated numerous processes using VBA macros that review thousands of promotional strategies, their effectiveness, then reallocating the budget for unnecessary initiatives back to cash
